

Torah Mantle Measuring Sheet

Please fill out one sheet for each torah mantle.

If ordering multiple torah covers, please label each torah with a number, and note each number on its matching Torah Mantle Measuring Sheet.

Torah Mantle # _____

Synagogue: _____

TOP VIEW

Measuring directions:

Remove the torah cover and silver ornaments. Close the torah's disks together.

If you received a paper template:

Place the enclosed template that you received in the mail over the torah's handles. Paper template should cover both disks of the torah.

In lieu of a template, or if the template does not fit:

Measure the diameter of each disk (A), and the overall distance across the two disks (B), from one outer edge to the other disk's outer edge. Then measure from the center of one spindle to the center of the other spindle (C).

Measuring the length: If you are happy with the length of the existing mantle, measure it. If not, take off the existing mantle, and measure from the top of the upper disk to the bottom of the lowest disk (D). Then add from ½" to 1", based on your preference for how much you would like the mantle to hang down, covering the bottom disks. Keep in mind that "finished length" is a subjective opinion. Feel free to adjust the length to your taste (eg, if you require different-sized torahs to look like they line up and appear to be the same length, you will need to adjust for that, and inform us).

Mantle Info:

Did the template fit? Yes No

If the template did not fit, an additional charge of \$125 will be added to your order to cover the cost of making a new template and a custom wooden oval.

If "No," please write measurements:

Diameter of disk (A): _____

Overall distance across the two disks (B): _____

Distance from center to center of handles (C): _____

Finished length: _____

Dedication: _____
